

Nicolas Macenco

FULL STACK DEVELOPER

Experience in React.js, Node.js, Typescript, relational databases, and ORMs such as Sequelize. I am a cheerful, persevering person with an excellent predisposition to work in a team. I am currently seeking new challenges that will allow me to add value to companies and improve my knowledge in web development.

WORK EXPERIENCE

Junior Analyst

Telefonica Argentina S.A

06/2022 - Present

- Create components with React and Typescript.
- Solve Front-end and Back-end Bugs.
- Deployments in Openshift.
- Work with the UX UI team to make the app able to change from one color to another by including tokens in it.

Freelance Projects

Workplace/Company

05/2022 - 04/2023

- **PcShop:** This project is an E-commerce. I was part of the FrontEnd team. It was built using React, TypeScript, Redux, Bootstrap, and Styled Components. During the project, we use agile methodology SCRUM and Git version control system.
- **Pokemon App:** SPA (Single Page Application) Consumes data from pokemon API and allows to create, update and delete pokemons. It was built using PostgreSQL, Sequelize, Express, Node Js, Redux and React.
- **SNKR:** This is an E-commerce that was built using MySQL, Sequelize, Express, Node Js, JavaScript, CSS, and HTML. During the project, we use agile methodology SCRUM. It was a great opportunity to learn how to work as a team and solve bugs in the code.

Tax - Associate 2

Price Waterhouse and Company - PWC

09/2019 - 04/2021

- This experience introduced me to the IT world. I started to work with the IT team automating processes with Power BI, and after that, I started to investigate Programming.
